

Benevolent House ACADEMY

Where Foundations Become Futures

PLAN OF OPERATION

Form 2948

Where Foundations Become Futures

508 N State Hwy 342, Red Oak, TX 75154
(469) 807-1221 | benevolenthouseacademy@gmail.com

Licensed Child Care Center | Nonprofit Corporation (501c3)
Head of Governing Body: Tanya Jones Orr
Chief Operating Officer: Christopher R. Orr
Designated Director: Tonya Dixon
Assistant Director: Haddie Ruth Xian Mashburn
Application Date: February 2026

APPLICANT INFORMATION

Operation Name: Benevolent House Academy

Location Address: 508 N State Hwy 342, Red Oak, TX 75154

Phone: (469) 807-1221

Email: benevolenthouseacademy@gmail.com

Operation Type: Licensed Child Care Center

Licensed Capacity: 52 children

Age Range: 6 weeks through 13 years

Hours of Operation: 24 hours a day, 7 days a week, year-round. The center is closed on the following holidays: New Year's Day, Martin Luther King Jr. Day, Memorial Day, Juneteenth, Independence Day (July 4th), Labor Day, Thanksgiving Day and the day after, Christmas Eve, Christmas Day, and New Year's Eve

Services: Day care, night care (overnight), transportation, meals (CACFP), before and after school care, and full-time care for school-age children (K-5th grade) whose families choose an alternative to traditional school enrollment

SECTION I: PERMIT HOLDER RESPONSIBILITIES

1. Who will be the person(s) responsible for ensuring that the Minimum Standard Rules are in compliance at all times?

The Center Director, Tonya Dixon, is responsible for ensuring daily on-site compliance with all minimum standards. The Assistant Director, Haddie Ruth Xian Mashburn, supports the Center Director and assumes the director role in her absence. The Governing Body Designee, Tanya Jones Orr (Head of Governing Body), maintains oversight responsibility and ensures the operation has adequate resources, personnel, and policies to maintain compliance at all times.

2. If the director or primary caregiver is not present at the center, who will be in charge?

When the director is absent from the center during operational hours, Haddie Ruth Xian Mashburn, Assistant Director, will serve as the designated person in charge. If both the Center Director and Assistant Director are absent, Tanya Jones Orr, Head of the Governing Body, will serve as the designated person in charge. The designated person in charge will be informed that they are in charge and the expected duration of the director's absence, their responsibilities while in charge, will have access to all necessary information to communicate with parents and state and local authorities, and will have the authority to manage the center in accordance with minimum standards per Section 746.1013.

3. How do you plan to maintain these records in order for all of the information to be current?

Benevolent House Academy uses the Brightwheel childcare management platform to maintain digital records for all enrolled children. Children's admission information is reviewed and updated at least every 6 months; infant feeding instructions are updated at least every 3 months. Personnel records are reviewed at the time of hire and updated as certifications and training are completed. The director conducts a comprehensive records audit at least quarterly to verify all files are current and complete. An employee tracking spreadsheet is maintained to monitor hire dates, background check due dates, training hours completed, and certification

expiration dates. All records are stored securely at the center and are available for review by licensing staff at any time.

4. What method(s) will you use to ensure that parents are informed?

Parents are informed through the Brightwheel app, which serves as the primary communication platform. Through Brightwheel, parents receive daily activity reports and photos, real-time notifications of illness or injury on the day of occurrence, messages about upcoming events and policy updates, and digital copies of incident reports. Additionally, operational policies are provided to each family at enrollment and updated copies are distributed whenever changes occur. Emergency notifications (such as communicable disease exposure, facility closures, or weather-related changes) are sent immediately through Brightwheel push notifications. A parent handbook outlining all policies is provided at enrollment and parents sign an acknowledgment of receipt.

5. How will you document sending this information to licensing and track when background checks are due?

Background checks are submitted through the HHSC online background check system upon hire for all employees and every 5 years thereafter. The director maintains a personnel tracking spreadsheet that includes each employee's name, date of hire, date of most recent background check, and the date the next background check is due. This spreadsheet is reviewed monthly by the director and quarterly by the Head of the Governing Body. Automated calendar reminders are set 90 days and 30 days prior to each employee's background check renewal date to ensure timely submission. Documentation of all background check submissions and results is maintained in each employee's personnel file.

6. How will new employees be oriented in the following topics?

All new employees complete a comprehensive orientation within 7 days of hire using the Benevolent House Academy New Employee Orientation Curriculum (see Appendix C). The orientation covers the following topics as specified on Form 2948:

Overview of Chapter 746 Minimum Standard Rules applicable to the employee's position and responsibilities. Overview of the operation's policies including discipline and guidance practices, procedures for the release of children, and daily operational procedures. Overview of the center's policy on the prevention, recognition, and reporting of child abuse and neglect, including: factors indicating a child is at risk of abuse or neglect, warning signs indicating a child may be a victim of abuse or neglect, procedures for reporting child abuse or neglect to DFPS, and community organizations that have training programs available to staff, children, and parents.

Overview of procedures for handling emergencies, which includes sharing the emergency preparedness plan with all employees. Emergencies covered include but are not limited to fire, explosion, tornado, toxic fumes, volatile persons, and severe injury or illness of a child or adult. Orientation also covers location and use of fire extinguishers and first-aid equipment, administering medication in compliance with 26 TAC Section 746.3803, preventing and responding to emergencies due to food or allergic reactions, understanding building and physical premises safety including identification and protection from hazards such as electric hazards, bodies of water, and vehicular traffic, handling, storing, and disposing of hazardous materials in compliance with 26 TAC Section 746.3425, and precautions for transporting children if the center transports a child whose chronological or developmental age is younger than nine years old.

Benevolent House Academy's orientation also includes trauma-informed care principles and social-emotional development practices (see Appendix C for the full curriculum). New employees receive 8 hours of preservice training before being given responsibility for a group of children. The remaining 16 hours of the required 24 hours of annual training are completed within 90 days of employment. Orientation documentation is signed by the employee and maintained in their personnel file. A copy of the orientation curriculum is available at the center for review by the licensing representative.

All employees are issued Benevolent House Academy branded shirts during orientation and are required to wear BHA-branded shirts during all operating hours so that parents, visitors, and children can easily identify authorized staff members.

7. How will you ensure that your caregivers receive the required hours of training?

Each caregiver is required to complete a minimum of 24 clock hours of annual training, and the director completes a minimum of 30 clock hours annually. The director maintains a training tracking spreadsheet for each employee that documents training topic, date completed, number of hours, and training provider. Training hours are reviewed monthly by the director. Employees who are behind on training hours are notified in writing and a plan is developed to complete the required hours before their annual anniversary date. Training is obtained through a combination of in-house training sessions, online courses through approved providers, and community-based workshops. Training topics are selected to align with minimum standards requirements and the developmental needs of the children served.

8. Do you have a preservice training curriculum or will you only hire caregivers who already meet the requirement?

Benevolent House Academy maintains a preservice training curriculum on site AND also seeks to hire caregivers who already meet preservice training requirements whenever possible. The preservice training curriculum covers all topics required by minimum standards and is available at the center for review by the licensing representative. New hires who have not yet completed preservice training complete the curriculum before being given sole responsibility for a group of children.

SECTION II: OPERATION/PHYSICAL FACILITIES

1. Each child must have 30 square feet of indoor activity space. On your attached floor plan, indicate which age group and how many children will be in each room or area.

The attached floor plan identifies each classroom with the designated age group and capacity. Indoor activity space meets the minimum of 30 square feet per child as required by Section 746.4205. The following table summarizes the room assignments:

Room	Age Group	Capacity	Ratio	Staff
Nursery	0-11 months	4	1:4	1
Classroom 1	12-17 months	5	1:5	1
Classroom 2	18 months - 2 years	9	1:9	1
Classroom 3	3 years	10	1:15	1
Classroom 4	4 years	10	1:18	1
Classroom 5	5-13 years	14	1:22/1:26	1
TOTAL		52		6

The nursery capacity is limited to 4 infants based on usable activity space after accounting for crib placement and required equipment. The permit allows a total infant capacity of 9 (4 in the nursery plus 5 in Classroom 1). Total building size is approximately 5,312 square feet. The Certificate of Occupancy allows a maximum of 59 persons. At full capacity: 52 children + 6 caregivers + 1 director = 59 persons.

2. List the equipment and materials you will have for each age group you plan to serve, including both indoor and outdoor equipment and materials.

A detailed equipment and materials list for each classroom and the outdoor play area is provided in Appendix D: Equipment and Materials Checklist. A summary for each age group is provided below:

Nursery (0-11 months): Safety-approved cribs, infant swings, bouncer seats, tummy time mats, soft blocks, rattles, teething toys, mirrors, board books, and a diaper changing station with safety strap.

Classroom 1 (12-17 months): Push/pull toys, soft dolls, stacking cups, sensory bins, board books, play kitchen items, low climbing structures, musical instruments, large crayons, finger paint, child-sized tables/chairs, individual cots, and a diaper changing station with safety strap near a handwashing sink.

Classroom 2 (2 years): Large building blocks, pretend play items, puzzles, crayons, markers, playdough, sensory tables, picture books, dress-up clothing, musical instruments, art easels, and individual cots.

Classroom 3 (3 years): Building blocks, puzzles, scissors/glue, painting supplies, dramatic play center, science exploration materials, books, alphabet/number manipulatives, writing materials, listening center, and individual cots.

Classroom 4 (4 years): Writing center with journals, math manipulatives, science center, art center, reading nook, dramatic play center, construction area, phonics materials, educational tablet, board games, and individual cots.

Classroom 5 (5-13 years): Homework supplies, age-appropriate books, board/card games, sports equipment, arts/crafts supplies, science kits, building sets, educational tablet access, and cots/mats as needed.

Outdoor (all ages, staggered): Climbing structure with slide, ride-on toys, balls, outdoor art supplies, sports equipment, picnic tables, and open space for running and group games.

3. How many toilets will your operation have?

7 toilets total: 5 child-accessible toilets (one in each classroom serving children 12 months and older), 1 office restroom, and 1 staff restroom.

4. How many sinks will your operation have?

A minimum of 7 sinks: one handwashing sink in or near each restroom, plus a handwashing sink in the nursery for use during diapering. Handwashing sinks are equipped with soap and disposable towels.

5. How will children be supervised when they are using the restroom?

Children are supervised in the restroom in an age-appropriate manner that ensures both safety and privacy. Toddlers (12-23 months) are directly assisted by a caregiver during toileting and diapering. Two-year-olds are accompanied by a caregiver who provides hands-on assistance as needed. Three- and four-year-olds use the restroom with a caregiver stationed at the restroom

door; the door remains open or ajar so the caregiver can hear and respond immediately while still providing reasonable privacy. School-age children (5-13 years) use the restroom independently with caregiver awareness of their location and the duration of their absence from the group. At no time is a child left unsupervised in a restroom for an extended period. Caregivers assist all children with handwashing as needed after toileting.

SECTION III: ACTIVITIES AND CHILD CAREGIVER RATIO

1. What methods of discipline and guidance will you and your caregivers use when children misbehave?

Benevolent House Academy uses a trauma-informed, social-emotional approach to child guidance. Caregivers are trained to understand that behavior is communication, and to respond with empathy, connection, and consistency. Caregivers use the following guidance techniques: positive reinforcement and encouragement, emotion coaching (helping children name and regulate their feelings), redirection to appropriate activities, setting clear and consistent limits, offering age-appropriate choices, natural and logical consequences, modeling appropriate behavior, co-regulation (a caregiver remaining calm and present to help a dysregulated child return to calm), and brief supervised separation from the group when necessary (not to exceed one minute per year of age).

The following methods are strictly prohibited and will result in immediate corrective action, up to and including termination: corporal punishment of any kind (spanking, hitting, slapping, pinching, shaking, biting, or any form of physical punishment), verbal abuse (threats, humiliation, profanity, shaming, or derogatory remarks), punishment associated with food, rest, or toileting, placing children in dark or locked rooms, requiring physical exercise as punishment, and any form of discipline that is frightening or humiliating to a child. These prohibitions are reviewed with all employees during orientation and annually thereafter.

Behavior Classification and Response

To ensure consistency and transparency, Benevolent House Academy classifies behaviors into three levels. The center's response is proportional to the severity and frequency of the behavior.

Level 1 Behaviors (Low-Level Concerns): These are developmentally typical behaviors that are addressed through routine guidance techniques. Examples include not following classroom rules, difficulty sharing or taking turns, minor verbal conflicts with peers, crying or whining, and refusing to participate in activities. Response: Caregivers use redirection, emotion coaching, and positive reinforcement. Parents are informed through daily reports if the behavior is persistent.

Level 2 Behaviors (Moderate Concerns): These are behaviors that are disruptive, persistent, or that may cause minor harm to the child, other children, or staff. Examples include biting, hitting, kicking, or pushing other children; throwing objects at others; persistent defiance or refusal to follow safety rules; destructive behavior toward classroom materials or property; and spitting at others. Response: The behavior is documented in an incident report. The parent is notified on the day of occurrence. If the behavior is recurring, the behavior escalation process is initiated.

Level 3 Behaviors (Serious Safety Concerns): These are behaviors that pose an immediate safety risk to the child, other children, or staff. Examples include severe physical aggression causing injury to another child or staff member, biting that breaks the skin, elopement (leaving

the classroom or building without permission), self-injurious behavior, and threatening behavior toward staff or children. Response: The child is immediately separated from the group in a supervised area. The parent is contacted for immediate pickup. The behavior escalation process is initiated at the appropriate step based on severity.

Suspension and Expulsion

Benevolent House Academy is committed to working with families before considering suspension or disenrollment. If a child's behavior is a concern, the following process will be followed:

- **Step 1: Parent Conference.** The Center Director and caregiver will meet with the parent to discuss the behavior, identify possible causes, and develop a plan together. Strategies may include schedule adjustments, classroom changes, or referrals to outside resources.
- **Step 2: Written Behavior Plan.** If the behavior continues, a written behavior plan will be developed in partnership with the family. The plan will outline specific goals, strategies, and a timeline for improvement.
- **Step 3: Temporary Suspension.** If the behavior plan does not result in improvement and the child's behavior continues to pose a safety risk to themselves, other children, or staff, the child may be temporarily suspended (1 to 5 days) to allow time for the family and center to reassess the plan.
- **Step 4: Disenrollment.** If all reasonable interventions have been exhausted and the behavior continues to pose a persistent safety risk, the center may disenroll the child. Parents will receive 5 business days of written notice with the reasons for the decision.

In cases where a child's behavior poses an immediate danger to themselves or others (such as severe physical aggression causing injury), the center may temporarily remove the child from the classroom and require immediate parent pickup. The behavior escalation process will begin at the appropriate step based on the severity of the incident.

Biting Policy

Benevolent House Academy recognizes that biting is a common, developmentally typical behavior in infants and toddlers. Young children may bite because they lack the language to express frustration, excitement, or sensory needs. Our response to biting is rooted in understanding the reason behind the behavior while keeping all children safe.

- **First incident:** The caregiver separates the children, comforts the child who was bitten, and provides first aid. The biting child is redirected using age-appropriate guidance. Both families are notified on the day of occurrence through an incident report. The caregiver documents the circumstances (time of day, activity, possible triggers) to identify patterns.
- **Second incident (or emerging pattern):** The Center Director reviews the documentation for patterns. The caregiver adjusts the classroom environment to reduce triggers (additional supervision during high-risk times, seating changes, sensory tools). The parent of the biting child is contacted for a conference (Step 1) to discuss observations and develop strategies together.
- **Third incident or continued pattern:** A written behavior plan (Step 2) is developed with the family. The plan may include shadow supervision, introduction of sensory

alternatives, schedule modifications, or referral to Early Childhood Intervention (ECI) or a behavioral specialist for evaluation. The Center Director monitors the plan daily.

- **Persistent biting after the plan is in place:** If biting continues despite consistent implementation of the behavior plan and the safety of other children remains at risk, temporary suspension (Step 3) may be used to allow the family and center to reassess. Disenrollment (Step 4) is considered only after all reasonable interventions have been exhausted.

At every step, caregivers respond with empathy and without shaming. Biting is never treated as willful misbehavior in infants and toddlers. The goal is always to identify what the child is communicating and to teach alternative ways to express that need.

Physical Aggression Policy (Hitting, Kicking, Pushing)

Physical aggression such as hitting, kicking, pushing, or throwing objects at others is addressed with the same trauma-informed, progressive approach. The center's response considers the child's age, developmental stage, and the context of the behavior.

- **First incident:** The caregiver intervenes immediately to ensure safety, separates the children involved, and uses emotion coaching to help the child identify what they were feeling. Both families are notified through an incident report on the day of occurrence.
- **Second incident (or emerging pattern):** The Center Director reviews the documentation for patterns. The caregiver implements targeted strategies (proximity supervision, offering choices before frustration escalates, teaching replacement behaviors). A parent conference (Step 1) is scheduled.
- **Third incident or continued pattern:** A written behavior plan (Step 2) is developed with the family. The plan may include individualized support strategies, a modified schedule, a classroom change, visual cue cards for emotional regulation, or referral for outside evaluation or support services.
- **Persistent aggression after the plan is in place:** If the behavior continues to pose a safety risk despite consistent implementation of the plan, temporary suspension (Step 3) and, if necessary, disenrollment (Step 4) may follow.

If a single incident of physical aggression results in serious injury to another child or a staff member, the center may require immediate parent pickup and begin the escalation process at Step 3 or Step 4 based on the severity of the incident.

2. List the activities that are appropriate for each age group you plan to serve. Include a sample schedule for each age group.

Detailed age-specific activity schedules are provided in Appendix B. A summary master schedule for daytime hours is provided below. Each classroom adapts this schedule to be developmentally appropriate for the age group served. Activity plans are posted in each classroom and updated regularly.

Master Daily Schedule (Daytime Hours)

Time	Activity
6:00 - 7:30 AM	Arrival, free play, breakfast preparation

7:30 - 8:30 AM	Breakfast (CACFP)
8:30 - 9:00 AM	Circle time, morning meeting, calendar
9:00 - 10:30 AM	Learning centers, structured activities, small group instruction
10:30 - 11:15 AM	Outdoor play (staggered by classroom)
11:15 - 12:00 PM	Lunch (CACFP)
12:00 - 2:30 PM	Nap/rest time (quiet activities for non-sleepers after 30 min)
2:30 - 3:00 PM	Afternoon snack (CACFP)
3:00 - 4:00 PM	Afternoon learning activities, art, music
4:00 - 5:00 PM	Outdoor play (staggered by classroom)
5:00 - 6:00 PM	Free play, pickup, transition to evening care

Night Care Schedule

Time	Activity
6:00 - 7:00 PM	Dinner (CACFP)
7:00 - 8:00 PM	Quiet play, reading, wind-down activities
8:00 - 8:30 PM	Bedtime routine (bath/wash, pajamas, teeth brushing)
8:30 PM - 6:00 AM	Sleep; awake caregiver(s) on duty at all times

For children in overnight care, the center provides age-appropriate sleeping arrangements including cribs for infants (bare cribs for children under 12 months), cots or mats for toddlers and older children, and individual bedding. Parents provide any comfort items. Awake caregivers remain on duty throughout the night and maintain required ratios. A minimum of 2 awake caregivers are on duty during all overnight hours to ensure ratio compliance across age groups and adequate coverage for emergencies. Per Texas licensing, children may not remain in continuous 24-hour care indefinitely. A break in care is required each calendar day.

Curriculum

Benevolent House Academy uses the Experience Curriculum by Brightwheel for infant through Pre-K 4 classrooms. The Experience Curriculum is a research-based early learning curriculum system that integrates hands-on learning, creative exploration, and skill-building activities tailored to each age group. It is aligned with all 50 states' early learning standards, Head Start, and NAEYC guidelines, and is fully integrated with the Brightwheel platform for seamless lesson planning, developmental observations, and family engagement. Monthly curriculum kits with lesson plans and hands-on learning materials are delivered directly to the center. The school-age program (5 years and older) follows an enrichment-based approach that includes academic support, STEM projects, art, music, life skills, and physical activity.

The center's programs incorporate three practices that make BHA unique: (1) a character development framework with monthly traits (kindness, courage, patience, respect) tied to activities, stories, and recognition; (2) daily social-emotional check-ins using feelings boards, morning circles, and calm-down corners; and (3) family connection practices that honor and celebrate diverse family structures.

Screen Time

Benevolent House Academy limits screen time in accordance with Texas Administrative Code Section 746.2105. Screen time is not used for children under 2 years of age. For children 2 years and older, screen time is limited to educational content only, does not exceed the limits established by minimum standards, and is never used as a substitute for physical activity, outdoor play, or caregiver interaction. Screen time is always supervised by a caregiver.

3. In what area will the children rest and what type of napping equipment will they use?

Children rest in their assigned classrooms. Each classroom has sufficient space for individual cots or mats to be placed with at least 2 feet of space between them during rest time. Infants (0-11 months) sleep in individual safety-approved cribs that meet CPSC standards with firm mattresses and fitted sheets only. No blankets, pillows, bumper pads, quilts, stuffed animals, toys, sleep positioners, loose sheets, attached pacifiers, pacifiers with clips, cords, or hooks, or any other soft objects or restrictive devices are allowed in the crib. Toddlers and preschool-age children (12 months through 4 years) rest on individual cots or rest mats with individual bedding (sheet and lightweight blanket). School-age children (5-13 years) have cots or mats available if needed. Rest time is scheduled daily from 12:00 to 2:30 PM. Children who do not fall asleep after 30 minutes are provided quiet activities such as books, puzzles, or coloring at their cot or at a table so as not to disturb sleeping children.

4. On the floor plan attachment, identify the rooms to be used for each age group and the number of caregivers needed when the room is at full capacity.

See the Room Assignments and Capacity table above in Section II, Question 1, and the attached floor plan with rooms labeled by age group. At full capacity, 6 caregivers plus the director are required.

SECTION IV: ACTIVITIES AWAY FROM THE OPERATION

1. If you plan to take field trips, how will you ensure that the appropriate minimum standards rules are maintained?

Benevolent House Academy will offer occasional field trips for children. The following procedures ensure compliance with minimum standards during field trips: written parental authorization is obtained for each field trip before departure, child-to-caregiver ratios are maintained at all times (with additional staff or parent volunteers as needed to meet ratios), a first aid kit is taken on all field trips, each caregiver carries a roster of children in their group with emergency contact information, a head count is conducted before departure, at each transition, and upon return, caregivers carry a charged cell phone for emergency communication, children wear identification (such as matching shirts or name badges) for easy identification, and all transportation complies with the center's transportation safety policies.

2. Water activities

The center may use sprinklers for outdoor water play activities. When water play activities are offered, the following safety measures are followed: children are directly supervised by a caregiver at all times during water activities, children under age 5 are within arm's reach of a caregiver during any water activity, water play equipment is cleaned and sanitized after each use, and the water activity area is on a level surface away from hard surfaces. No swimming or

wading pools are located at the operation and children will not be taken off-site to a swimming pool.

3. If you plan to provide transportation, how will you ensure that the appropriate minimum standards rules are maintained?

Benevolent House Academy provides transportation services for school-age children to and from local schools. All transportation complies with Chapter 746, Subchapter R of the Texas Minimum Standards. Vehicles used for transportation are properly maintained, insured, and inspected. Each child transported has written parental authorization on file. A caregiver who has completed the required transportation safety training is present during all transport. Children are secured in age-appropriate safety restraints in compliance with Texas law. A head count is conducted before departure and upon arrival at each destination. No child is ever left unattended in a vehicle. During loading and unloading, a caregiver visually checks the entire vehicle interior (including under seats and in the back) after all children have exited to ensure no child is left behind. This visual check is documented each time.

Transportation Emergencies

In the event of a transportation emergency (vehicle breakdown, accident, or medical emergency during transport), the following procedures apply:

- The driver or accompanying caregiver calls 911 immediately if there is an injury or imminent danger.
- All children remain secured in the vehicle unless the vehicle is unsafe (fire, smoke, or structural damage), in which case children are moved to a safe location away from traffic.
- The driver contacts the Center Director immediately to report the situation.
- The Center Director arranges for a replacement vehicle or alternate transportation and notifies parents of all children being transported.
- A head count is conducted immediately and continuously until all children are accounted for and safely returned to the center or released to their parents.
- An incident report is completed for every transportation emergency.

SECTION V: SAFETY, SANITATION AND FIRE

1. How will you ensure that the operation, both indoors and outdoors, is maintained to protect the health and safety of children?

The center conducts a daily safety check of all indoor and outdoor areas before children arrive each morning. The safety check includes verifying that all exits are clear and accessible, electrical outlets are covered, cleaning supplies and hazardous materials are locked and out of children's reach, outdoor play equipment is in good repair with no broken parts or sharp edges, the outdoor area is free of debris, standing water, and animal waste, all gates and fences are secure, indoor floors are clean and free of tripping hazards, and all areas are adequately lit and ventilated. Any identified hazards are corrected immediately before children are allowed access to the area. The daily safety check is documented on a checklist maintained at the center.

2. What is your plan for identifying persons who are authorized to pick up a child?

Authorized pickup persons are identified at enrollment and documented in the child's file in Brightwheel. Only persons listed on the child's authorized pickup list are allowed to remove a child from the center. If a caregiver does not recognize the person picking up the child, the caregiver requests a valid government-issued photo ID and verifies the name against the authorized pickup list before releasing the child. If the person is not on the authorized list, the caregiver contacts the parent to obtain verbal or written authorization before releasing the child. No child is released to an unauthorized person under any circumstances. If a custody order restricts pickup by a specific individual, a copy of the order is maintained in the child's file and all caregivers are informed.

3. In areas that are enclosed or have an obstructed view, how will caregivers observe children at all times?

The facility is designed with open classroom layouts to maximize visibility. For any areas with an obstructed view, such as restroom areas or corners, caregivers position themselves to maintain a line of sight to all children. When children are using the restroom, caregivers remain at the restroom door. During outdoor play, caregivers are stationed at different points in the play area to ensure complete coverage. Caregivers conduct frequent head counts throughout the day. The director conducts periodic walk-throughs to verify that supervision practices are being followed. Mirrors are installed in any areas where sightlines are obstructed, if needed.

4. How will you ensure that the building, grounds, equipment, and supplies are maintained in a clean and sanitary manner?

The center follows a daily, weekly, and monthly cleaning and sanitation schedule. Daily tasks include: sanitizing all tables before and after meals and snacks, sanitizing diaper changing surfaces after each use, cleaning and sanitizing restrooms at least twice daily and as needed, sweeping and mopping floors, removing trash, and sanitizing toys that have been mouthed by infants and toddlers. Weekly tasks include: deep cleaning of all floors, laundering cot sheets and bedding, sanitizing all toys and materials, and cleaning windows and low surfaces. Monthly tasks include: deep cleaning of kitchen appliances, inspection and cleaning of outdoor equipment, and sanitizing storage areas. All cleaning products used are non-toxic and stored in a locked cabinet out of children's reach. The cleaning schedule is posted and documented.

5. How will you ensure that you and your caregivers wash their hands as specified in the minimum standard rules?

Handwashing procedures are posted at every sink in the center with visual step-by-step instructions. Children and staff wash hands with soap and running water: upon arrival at the center, before and after eating meals or snacks, before and after preparing or serving food, after toileting or assisting a child with toileting, after diapering, after wiping a child's nose or handling bodily fluids, after outdoor play, after handling animals or pets, and before and after administering medication. Caregivers assist younger children with proper handwashing technique. The director monitors handwashing compliance through observation during daily operations. Handwashing is reinforced during orientation and ongoing training.

6. How will you ensure that you and your caregivers follow diapering procedures as specified in the minimum standard rules?

Diaper changing stations are located in the nursery and in Classroom 1 (12-17 months), as both age groups include children in diapers. Each station is equipped with a commercial diaper changing station with a safety strap and is located near a handwashing sink. Diapering procedures are posted at the changing station and include the following steps: prepare supplies before placing the child on the changing table, place the child on the changing surface and

fasten the safety strap (never leave a child unattended on the changing table), remove the soiled diaper and place it in a hands-free covered receptacle, clean the child from front to back using disposable wipes, apply any creams or ointments as directed by the parent, put on a clean diaper, dress the child, wash the child's hands, place the child in a safe area, clean and sanitize the changing surface, and wash caregiver's hands thoroughly with soap and water. Diaper changing surfaces are sanitized after each use. Soiled diapers are disposed of in a lined, covered, hands-free receptacle that is emptied and cleaned daily. Diapering procedures are covered during orientation and observed by the director to ensure compliance.

7. What is your plan to ensure the safety of children in case of fire, lockdown, or other emergency? Identify the designated relocation areas in and outside of the operation.

Benevolent House Academy maintains a comprehensive emergency preparedness plan addressing fire, severe weather, lockdown, and other emergencies. The plan is reviewed with all staff during orientation and at least annually.

Fire: Fire drills are conducted monthly and documented with the date, time, number of children participating, and time required to evacuate. Fire extinguishers are inspected annually and mounted in accessible locations. Smoke detectors are installed and maintained throughout the facility. The facility has clearly marked exits and emergency lighting. Evacuation routes are posted in every room.

Severe Weather: Severe weather (tornado/storm) drills are conducted quarterly. The designated indoor shelter areas are the interior hallway and interior rooms away from exterior windows. A battery-operated weather radio is maintained at the center.

Lockdown: In the event of a threat requiring lockdown, all exterior doors are secured, children are moved away from windows and doors, a head count is verified, 911 is contacted, and staff remain in lockdown until cleared by law enforcement. Lockdown drills are conducted quarterly.

Medical Emergencies: Staff trained in first aid and CPR administer immediate care. 911 is called for life-threatening situations. Parents are notified immediately. An incident report is completed for all injuries and medical emergencies.

Designated Relocation Sites

If the facility must be evacuated and cannot be reoccupied, children will be transported to the nearest available designated relocation site. Benevolent House Academy maintains the following designated relocation sites:

- Oaks Church, 777 S I-35E, Red Oak, TX 75154 (primary daytime relocation site)
- Red Oak Fire Department, 111 Live Oak Street, Red Oak, TX 75154 (after-hours/alternate site)
- Benevolent House, 504 SH-342, Red Oak, TX 75154 (alternate site)
- Adventure Academy, 103 Houston School Rd, Red Oak, TX 75154 (alternate site)

The specific relocation site used will depend on the nature, location, and timing of the emergency. The Center Director or designee will determine the appropriate site based on the circumstances. Parents are notified immediately of the relocation through Brightwheel and phone calls with the specific relocation address. Emergency records for all children are transported with the group.

SECTION VI: PHYSICAL HEALTH AND WELL-BEING

1. What is your plan when a child gets ill or injured while at the operation?

When a child becomes ill, the caregiver notifies the director and the child is separated from the group in a supervised area until the parent can pick up. Parents are notified immediately through Brightwheel and by phone. The center follows the Communicable Disease Chart for Schools and Child-Care Centers published by the Texas Department of State Health Services for exclusion and readmission criteria. When a child is injured, the caregiver provides appropriate first aid. For serious injuries, 911 is called immediately. Parents are notified on the day of occurrence regardless of the severity of the injury. A written incident report is completed for every illness and injury, signed by the caregiver and the parent, and maintained in the child's file.

If a child or employee at the center contracts a communicable disease deemed notifiable by the Texas Department of State Health Services, all parents will be notified in writing within 48 hours. If there is an outbreak of lice or other infestation in a group, all parents in that group will be notified within 48 hours.

Health Checks

Caregivers conduct a visual health check of each child upon arrival each day. The health check includes observing the child for signs or symptoms of illness or injury, changes in behavior, and any visible marks or bruises. If a caregiver observes anything of concern, the parent will be asked for an explanation and the observation will be documented. If a child arrives showing signs of illness that meet the exclusion criteria, the parent will be asked to take the child home.

2. How will you ensure that medication is given properly?

Medication is administered only with written parental authorization and only as directed on the label and by a physician's written instructions, when applicable. The parent must complete a medication authorization form that includes the child's name, name of medication, dosage, time and method of administration, and any special instructions. All medications are stored in the original labeled container with the child's name, out of reach of children. Medications requiring refrigeration are stored in a small dedicated refrigerator in the office, separate from food items. A medication administration log is maintained that records the child's name, medication name, dosage given, time administered, and the name of the caregiver who administered it. The caregiver verifies the child's identity, medication name, dosage, time, and route before each administration. Medications are returned to the parent when no longer needed. Expired medications are removed from storage immediately and returned to the parent; if the parent cannot be reached, expired medications are disposed of in accordance with safe disposal practices.

Medication Safety Plan

If a child requires ongoing or emergency medication (such as an epinephrine auto-injector, inhaler, or seizure medication), the parent and the Center Director will develop a written medication safety plan that includes the condition, triggers, medication details, administration instructions, and emergency response steps. The plan is kept in the child's file and a copy is posted in the child's classroom (accessible to staff, not visible to other families).

Unable to Reach Parent Regarding Medication

If a question or concern arises regarding a child's medication and the center is unable to reach the parent after three (3) contact attempts (phone call to parent, then to each emergency contact on file), the center will contact Poison Control at 1-800-222-1222 for guidance. In a medical emergency, 911 will be called immediately regardless of whether the parent has been reached. Parent authorization is not required to administer medication in a medical emergency to prevent the death or serious bodily injury of a child, per TAC 746.3803(d).

Epinephrine Auto-Injectors

Benevolent House Academy does not maintain an unassigned epinephrine auto-injector at this time. If a child has a known risk of anaphylaxis, the parent must provide a current, unexpired, prescribed epinephrine auto-injector with a completed medication authorization form and a food allergy emergency plan. The auto-injector will be stored in the child's classroom in a location accessible to staff and out of reach of children.

3. How will you ensure that the nutritional needs of the children are met on a daily basis? What meals will you serve? Provide a sample menu for a week on an attachment.

Benevolent House Academy will participate in the Child and Adult Care Food Program (CACFP) to provide nutritious meals and snacks. Breakfast, lunch, afternoon snack, and dinner (for night care children) are served daily. Menus are planned in accordance with USDA nutritional guidelines and the CACFP meal pattern requirements. Weekly menus are posted in the kitchen and near the parent sign-in area for parent review. Food allergies and dietary restrictions are documented at enrollment, posted in the kitchen (first name only), and communicated to all caregivers. Caregivers verify each child's allergy information before serving meals. A sample weekly menu is provided in Appendix A.

Outside Food Policy

As a general practice, outside food is not permitted at Benevolent House Academy. The center provides all meals and snacks, and the menu is designed to meet the nutritional needs of all children in care. If a child has a documented sensory need, religious dietary requirement, or health-based or medical dietary need that cannot be accommodated by the center's menu, the parent may request to provide the child's meals and snacks from home. In accordance with TAC 746.3309(a), the enrollment agreement or an addendum signed by the parent must include a statement that: (1) the parent is choosing to provide the child's meals and snacks from home; and (2) the parent understands the child-care center is not responsible for its nutritional value or for meeting the child's daily food needs. All parent-provided food must be labeled with the child's first and last name and date, and stored properly. If the parent provides a meal but not a snack, the center will provide the snack. Parent-provided snacks may not be shared with other children unless the parent is providing baked goods for a classroom celebration and the items comply with the center's food safety and allergy policies.

Infant Feeding

Infants are fed according to their individualized feeding plan provided by the parent. Infant feeding instructions are obtained from each parent in writing and updated at least every 3

months. Breast milk and/or formula are provided by the parent (unless using the center-provided standard formula). Iron-fortified infant cereal and age-appropriate pureed or soft foods are introduced based on the parent's written instructions and the child's developmental readiness. Infants are fed on demand and are never forced to eat.

8. Will the parents be required to supply any food?

No, parents are not required to supply food. The center provides all meals and snacks through the CACFP. However, parents may choose to provide food for their child if the child has a documented sensory need, religious dietary requirement, or health-based or medical dietary need that cannot be accommodated by the center's menu, subject to the outside food policy described above.

ADDITIONAL OPERATIONAL POLICIES

Animals

Benevolent House Academy does not keep animals or pets at the center. No animals are permitted on the premises during operating hours except for a special educational activity (such as a classroom visit from a local nature organization), in which case parents will be notified in advance. Children will only interact with animals under direct adult supervision, and any child with a known allergy to animals will be accommodated. All children wash their hands after any contact with animals.

Sunscreen and Insect Repellent

Benevolent House Academy does not provide sunscreen or insect repellent. If a parent would like the center to apply sunscreen or insect repellent to their child, the parent must provide the product labeled with the child's first and last name and complete a written authorization form specifying the product and when it should be applied. Only commercial, store-bought, EPA-registered products will be applied. The center will not apply homemade or unlabeled products. The authorization form specifies the type of product, the frequency of application, and any known sensitivities. Parents are encouraged to apply sunscreen before drop-off on days when outdoor play is expected. Staff will reapply during the day if authorization and a labeled product are on file.

Physical Activity and Outdoor Play

Benevolent House Academy promotes daily physical activity for all children as an essential part of healthy development. The benefits of physical activity include supporting cardiovascular health, strengthening muscles and bones, improving coordination and balance, building confidence, enhancing social skills through cooperative play, and supporting cognitive development and self-regulation.

Children participate in both structured (caregiver-led) and unstructured (child-initiated) physical activities each day. Outdoor play is scheduled at least twice daily for all age groups (staggered by classroom). Physical activity takes place in the following settings: the outdoor play area (primary setting for gross motor activities, riding toys, climbing, running, and group games), individual classrooms (music and movement, yoga, dance, and indoor gross motor activities),

and the indoor common area (obstacle courses and large-group movement activities during inclement weather).

Children should wear clothing and closed-toe shoes that allow them to run, climb, and move freely during outdoor and indoor physical activities. Children go outside daily unless weather conditions pose a significant health risk. The center uses the following criteria to determine when outdoor play is limited or moved indoors: temperatures at or above 100 degrees F (heat index), temperatures at or below 32 degrees F (wind chill), active thunderstorms or lightning, tornado warnings, heavy rain, ice, or other hazardous conditions as determined by the Center Director. On days when extreme weather limits outdoor play, indoor physical activity is provided to ensure children still have opportunities for active movement. Indoor alternatives include music and movement sessions, dance, yoga, obstacle courses, and other structured gross motor activities.

Immunization Requirements

Each child enrolled at Benevolent House Academy must meet the immunization requirements specified by the Texas Department of State Health Services (DSHS) for their age. Current immunization records must be provided at enrollment and kept up to date throughout the child's enrollment. Exemptions are available for medical reasons (signed by a physician) or for reasons of conscience, including religious beliefs (using the official DSHS affidavit form, which must be notarized). Children on provisional enrollment must complete required immunizations within the timelines established by DSHS rules.

Hearing and Vision Screening

Texas law requires hearing and vision screening for children ages 4 and older. Parents are responsible for ensuring their child receives the required screenings and providing documentation to the center.

Vaccine-Preventable Diseases

Benevolent House Academy maintains a policy on vaccine-preventable diseases as required by TAC 746.3611. The center encourages all employees to stay current on recommended immunizations to protect the health of children in care. Information about vaccine-preventable diseases and the center's employee immunization practices is available from the Center Director upon request.

Inclusive Services for Children with Special Care Needs

Benevolent House Academy is committed to providing inclusive care for all children, including children with disabilities, developmental delays, or other special care needs, in compliance with the Americans with Disabilities Act (ADA). The center will make reasonable accommodations to support each child's participation. If a child receives Early Childhood Intervention (ECI) services or special education services, qualified service providers are welcome to deliver those services at the center with parental request and approval. Caregivers integrate children with and without

special care needs into all activities and adapt equipment and procedures as necessary to ensure that children with special needs are cared for in a natural environment.

Parent Rights

Parents may visit the center at any time during hours of operation to observe their child, the program activities, the building, the premises, and the equipment without having to secure prior approval. Parents have the right to breastfeed their child or provide breast milk for their child while in care. Benevolent House Academy provides a comfortable, private area with an adult-sized seat within the center for mothers who wish to breastfeed. Parents have the right to review their child's records, the center's most recent licensing inspection report, and the center's operational policies at any time during hours of operation. Parents may access the Texas Minimum Standards for Child-Care Centers (Chapter 746) online at www.hhs.texas.gov/childcare, contact the Texas Abuse and Neglect Hotline at 1-800-252-5400, or visit the HHSC website at www.hhs.texas.gov. Benevolent House Academy will never retaliate against any parent for exercising any of their rights under Texas law.

Parent Involvement and Participation

Benevolent House Academy welcomes and encourages parent involvement. Parents may volunteer in their child's classroom, attend parent events and celebrations, communicate regularly with their child's caregiver and the Center Director, provide feedback on center policies and activities, and join classroom field trips as a parent volunteer (subject to background check requirements). All regular volunteers must complete a background check.

Questions, Concerns, and Grievances

Parents are welcome to review and discuss any of the center's policies and procedures with the Center Director at any time. If a parent has questions, concerns, or feedback about their child's care, classroom activities, or center policies, they are encouraged to speak with the Center Director. If the concern is not resolved to the parent's satisfaction, the parent may contact the Executive Director, Tanya J. Orr, by phone at (469) 807-1221 or by email at benevolenthouseacademy@gmail.com. If the parent believes the concern involves a violation of licensing standards or child safety, the parent may also contact HHSC Child Care Regulation at 1-800-582-6036 or the DFPS Abuse and Neglect Hotline at 1-800-252-5400. Parents are never required to go through the center first before contacting a regulatory agency.

Child Abuse and Neglect Prevention and Reporting

Every employee at Benevolent House Academy is a mandatory reporter under Texas law. All employees complete annual training on recognizing the signs and symptoms of child abuse and neglect, understanding risk factors, and fulfilling their legal obligation to report. The center educates employees and parents on warning signs that a child may be a victim of abuse or neglect and factors that may place a child at increased risk. Employees are trained in prevention techniques, including maintaining appropriate boundaries, proper supervision practices, and creating a safe environment. Benevolent House Academy coordinates with community organizations, including DFPS, local law enforcement, and family support agencies, to support

child safety. Parents may report suspected abuse or neglect directly to the Texas DFPS Abuse and Neglect Hotline at 1-800-252-5400 or online at www.txabusehotline.org at any time.

Liability Insurance Notice

As of the effective date of this plan, Benevolent House Academy does not carry liability insurance due to financial reasons, as permitted under Texas Administrative Code Section 746.205. Parents are provided with a separate written notice about this before their child is admitted into care. When insurance is obtained, the center will carry a minimum of \$300,000 per occurrence as required by TAC 746.203.

Gang-Free Zone Notice

Under the Texas Penal Code, any area within 1,000 feet of a child-care center is a gang-free zone. Criminal offenses related to organized criminal activity that occur in a gang-free zone are subject to harsher penalties under Texas law.

Late Pickup Policy

Pickup must occur by the parent's scheduled pickup time. A fee of \$1 per minute begins immediately after the scheduled pickup time. If 30 minutes have passed after the scheduled pickup time and the center has not been able to reach the parent by phone, the center will begin calling the emergency contacts listed in the child's file. If the center is unable to reach the parent or any emergency contact within one hour after the scheduled pickup time, the center is required to contact local law enforcement and/or Child Protective Services. Chronic late pickup (defined as 5 or more instances in a rolling 12-month period) may result in disenrollment after a meeting with the family.

Weather Closures and Center Closures

In the event of severe weather, power outages, or other emergencies that make it unsafe to operate, the center may close temporarily. Parents will be notified as early as possible through Brightwheel push notifications, text message, and/or phone call. Tuition is due regardless of weather-related closures. If the center is closed for 5 or more consecutive business days, tuition credits will be evaluated on a case-by-case basis by the Executive Director.

INFANT CARE PROVISIONS

The nursery provides specialized care for infants ages 0-11 months. Infant feeding instructions are obtained from each parent in writing and updated at least every 3 months. Each infant follows an individualized schedule for feeding, sleeping, and diapering. Infants are always placed on their backs to sleep in bare cribs. No blankets, pillows, bumper pads, quilts, stuffed animals, toys, sleep positioners, loose sheets, attached pacifiers, pacifiers with clips, cords, or hooks, or any other soft objects or restrictive devices are allowed in the crib, in compliance with safe sleep standards per Section 746.2409. Swaddling is not permitted. Tummy time is provided daily under direct supervision when infants are awake. Caregivers assigned to the infant room

complete one hour of preservice training specific to infant care topics including prevention of SIDS, shaken baby syndrome/abusive head trauma, and early brain development.

COMPLIANCE COMMITMENT

Benevolent House Academy is committed to full compliance with Chapter 746 of the Texas Administrative Code (Minimum Standards for Child-Care Centers), Chapter 42 of the Texas Human Resources Code, and all applicable rules and regulations governing licensed child care operations in Texas. The director is responsible for ensuring daily on-site compliance. The head of the governing body ensures the operation has adequate resources, personnel, and policies to maintain compliance. The center cooperates fully with all Child Care Regulation inspections, investigations, and technical assistance visits. All deficiencies identified during inspections are corrected promptly.

SIGNATURE

A separate signature page is provided and maintained on file.

APPENDIX A: SAMPLE WEEKLY MENU (CACFP-COMPLIANT)

The following sample menu meets USDA Child and Adult Care Food Program (CACFP) meal pattern requirements. Menus are rotated and updated seasonally. Substitutions are made for children with documented food allergies or dietary restrictions. Whole grain-rich items are served at least once per day. Water is available to children throughout the day.

Monday

Meal	Menu Items
Breakfast	Whole grain oatmeal with diced peaches, 1% milk
Lunch	Baked chicken drumstick, steamed green beans, brown rice, diced pears, 1% milk
PM Snack	Whole wheat crackers with string cheese, water
Dinner	Spaghetti with meat sauce, side salad with ranch, garlic bread (WG), applesauce, 1% milk

Tuesday

Meal	Menu Items
Breakfast	Whole wheat toast with scrambled eggs, mixed fruit cup, 1% milk
Lunch	Turkey and cheese sandwich on whole wheat, baby carrots with hummus, banana, 1% milk
PM Snack	Apple slices with peanut butter (or sunflower butter), water
Dinner	Beef taco with whole wheat tortilla, refried beans, shredded lettuce, diced tomatoes, mandarin oranges, 1% milk

Wednesday

Meal	Menu Items
Breakfast	Whole grain cereal with sliced bananas, 1% milk
Lunch	Baked fish sticks, corn, whole wheat roll, mixed fruit, 1% milk
PM Snack	Yogurt with granola, water
Dinner	Chicken stir-fry with mixed vegetables, brown rice, pineapple chunks, 1% milk

Thursday

Meal	Menu Items
Breakfast	Whole wheat pancakes with strawberries, 1% milk
Lunch	Beef chili with beans, cornbread, steamed broccoli, peach slices, 1% milk
PM Snack	Celery sticks with cream cheese, water

Dinner	Grilled cheese on whole wheat with tomato soup, cucumber slices, grapes, 1% milk
--------	--

Friday

Meal	Menu Items
Breakfast	Breakfast burrito (eggs, cheese, WG tortilla), diced melon, 1% milk
Lunch	BBQ pulled chicken sandwich on whole wheat bun, coleslaw, baked beans, watermelon, 1% milk
PM Snack	Trail mix (cereal, raisins, pretzels), water
Dinner	Baked macaroni and cheese (WG pasta), steamed peas, dinner roll, fruit salad, 1% milk

Infant Meals: Infants are fed according to their individualized feeding plan provided by the parent. Breast milk and/or formula are provided by the parent. Iron-fortified infant cereal and age-appropriate pureed or soft foods are introduced based on the parent's written instructions and the child's developmental readiness. Infants are fed on demand and are never forced to eat.

Note: Peanut butter is replaced with sunflower seed butter for classrooms with documented nut allergies. All allergens are cross-referenced against enrolled children's allergy documentation before each meal is served. WG = Whole Grain-Rich.

APPENDIX B: AGE-SPECIFIC ACTIVITY SCHEDULES

The following schedules are tailored to the developmental needs of each age group served at Benevolent House Academy. Each classroom posts its activity plan and updates it regularly. All schedules include a balance of indoor and outdoor activities, active and quiet activities, individual and group activities, and caregiver-directed and child-initiated activities. Infant through Pre-K 4 classrooms use the Experience Curriculum by Brightwheel, a research-based early learning curriculum system integrated with the Brightwheel platform for lesson planning, developmental observations, and family engagement.

Nursery: Infants (0-11 Months)

Infants follow individualized schedules based on each child's needs and parent instructions. The following represents a general framework:

Time	Activity	Developmental Focus
6:00 - 8:00 AM	Arrival, feeding on demand	Secure attachment, responsive care
8:00 - 9:00 AM	Tummy time, sensory exploration	Gross motor, sensory development
9:00 - 10:00 AM	Music, singing, reading board books	Language, auditory development
10:00 - 11:00 AM	Nap (on demand), feeding	Physical rest, nutrition
11:00 - 12:00 PM	Mirror play, soft toys, caregiver interaction	Self-awareness, fine motor
12:00 - 2:30 PM	Feeding, nap (on demand)	Physical rest, nutrition
2:30 - 3:00 PM	Outdoor stroller walk (weather permitting), sensory bins	Sensory, environmental awareness
3:00 - 6:00 PM	Feeding, free exploration, pickup	Self-directed exploration

Note: Infants are fed on demand. Diapering occurs as needed throughout the day (minimum every 2 hours or more frequently as needed). All infants are placed on their backs to sleep in bare cribs. Infants are never left in swings, bouncers, or car seats for sleeping.

Classroom 1: Toddlers (12-17 Months)

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, free play with soft toys	Social-emotional, separation transition
7:30 - 8:15 AM	Breakfast	Self-feeding skills, nutrition
8:15 - 9:00 AM	Music and movement, finger plays	Language, gross motor
9:00 - 9:45 AM	Sensory bins, stacking/sorting toys, push/pull toys	Fine motor, cognitive, cause/effect
9:45 - 10:15 AM	Outdoor play (balls, riding toys, chalk)	Gross motor, exploration
10:15 - 11:15 AM	Story time, board books, puppet play	Language, literacy, imagination

11:15 AM - 12:00 PM	Lunch	Self-feeding, social interaction
12:00 - 2:30 PM	Nap on individual cots	Physical rest
2:30 - 3:00 PM	Snack	Nutrition, self-help
3:00 - 4:30 PM	Art exploration (finger paint, large crayons)	Fine motor, creativity, sensory
4:30 - 5:00 PM	Outdoor play	Gross motor, social
5:00 - 6:00 PM	Free play, pickup	Choice, independence

Classroom 2: Toddlers (18 Months - 2 Years)

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, free play, table toys	Social skills, fine motor
7:30 - 8:15 AM	Breakfast	Self-help, nutrition
8:15 - 8:45 AM	Circle time (songs, finger plays, felt board)	Language, social, listening
8:45 - 10:00 AM	Learning centers: playdough, blocks, pretend play, sensory table	Cognitive, fine motor, imagination
10:15 - 10:45 AM	Outdoor play (ride-on toys, balls, chalk)	Gross motor, social, sensory
10:45 - 11:15 AM	Story time, flannel board stories	Literacy, vocabulary
11:15 AM - 12:00 PM	Lunch	Self-feeding, manners
12:00 - 2:30 PM	Nap on individual cots	Physical rest
2:30 - 3:00 PM	Snack	Nutrition
3:00 - 4:00 PM	Art projects, music and dance	Creativity, gross motor, expression
4:00 - 4:30 PM	Outdoor play	Gross motor, exploration
4:30 - 6:00 PM	Free play, pickup	Choice, wind-down

Classroom 3: Three-Year-Olds

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, table activities (puzzles, books)	Fine motor, literacy
7:30 - 8:15 AM	Breakfast	Self-help, social
8:15 - 8:45 AM	Circle time (calendar, weather, letter of the week)	Math concepts, literacy, routine
8:45 - 10:15 AM	Learning centers: science table, writing, dramatic play, blocks, art	STEM, literacy, creativity, social
10:15 - 10:45 AM	Story time, read-aloud	Comprehension, vocabulary
10:45 - 11:15 AM	Outdoor play (climbing, group games, nature walks)	Gross motor, cooperation, science
11:15 AM - 12:00 PM	Lunch	Self-help, conversation

12:00 - 2:30 PM	Nap/rest on cots (quiet activities after 30 min)	Rest, self-regulation
2:30 - 3:00 PM	Snack	Nutrition
3:00 - 3:30 PM	Themed art projects, music, STEM activity	Creativity, cognitive
3:30 - 4:00 PM	Outdoor play	Gross motor, social
4:00 - 6:00 PM	Free play, puzzles, pickup	Choice, independence

Classroom 4: Four-Year-Olds (Pre-K)

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, journaling, table activities	Literacy, fine motor
7:30 - 8:15 AM	Breakfast	Self-help, social skills
8:15 - 9:15 AM	Circle time (calendar, phonics, number of the day, sharing)	Math, literacy, social-emotional
9:15 - 9:45 AM	Outdoor play (organized games, obstacle course, free play)	Gross motor, teamwork, following rules
9:45 - 11:00 AM	Small group instruction and learning centers: writing, math manipulatives, science experiments, reading nook, computer/tablet	School readiness, STEM, literacy
11:15 AM - 12:00 PM	Lunch	Self-help, conversation, manners
12:00 - 2:30 PM	Nap/rest on cots (quiet activities after 30 min)	Rest, self-regulation
2:30 - 3:00 PM	Snack	Nutrition
3:00 - 3:30 PM	Outdoor play	Gross motor, free choice
3:30 - 4:30 PM	Art, music, dramatic play, STEM challenges	Creativity, problem-solving
4:30 - 6:00 PM	Free play, board games, pickup	Social skills, wind-down

Classroom 5: School-Age (5-13 Years)

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, breakfast, quiet activities/reading	Self-direction, literacy
7:30 AM	Transport to school	Independence, routine
3:00 - 3:30 PM	Return from school, snack	Transition, nutrition
3:30 - 5:00 PM	Homework time (staff available for assistance)	Academic support, responsibility
5:00 - 5:30 PM	Outdoor play, sports, organized games	Gross motor, teamwork, leadership

5:30 - 6:00 PM	Free choice: board games, arts/crafts, reading, pickup	Choice, social, creativity
----------------	--	----------------------------

Classroom 5: Full-Day Scholars (K-5th Grade)

The following full-day schedule is for school-age children (K-5th grade) who attend Benevolent House Academy full-time rather than a traditional school.

Time	Activity	Developmental Focus
6:00 - 7:30 AM	Arrival, breakfast, quiet reading	Routine, nutrition, literacy
7:30 - 8:00 AM	Morning meeting, goal setting	Social-emotional, planning
8:00 - 9:30 AM	Academic support (reading, writing, math with staff assistance)	Literacy, numeracy, school readiness
9:30 - 10:00 AM	Movement break, outdoor free play	Gross motor, self-regulation
10:00 - 11:15 AM	Enrichment (STEM projects, art, music, life skills)	Critical thinking, creativity
11:15 AM - 12:00 PM	Lunch (CACFP)	Nutrition, social skills
12:00 - 12:30 PM	Quiet reading or rest	Self-regulation, literacy
12:30 - 2:30 PM	Project-based learning (science, writing, community projects)	Problem-solving, collaboration
2:30 - 3:00 PM	Afternoon snack (CACFP)	Nutrition
3:00 - 3:30 PM	Joins returning students, free choice activities	Social skills, transition
3:30 - 5:00 PM	Combined group: homework and enrichment	Academic support, responsibility
5:00 - 5:30 PM	Outdoor play	Gross motor, teamwork
5:30 - 6:00 PM	Free choice, pickup	Choice, social, creativity

Full-time scholars' families direct their child's educational goals. BHA provides a structured, supportive environment with academic support time, enrichment activities, and educational materials. BHA does not serve as an accredited school and does not issue grades or academic transcripts. During school holidays, teacher workdays, and summer, all school-age children follow this same full-day schedule.

APPENDIX C: NEW EMPLOYEE ORIENTATION CURRICULUM

Benevolent House Academy's orientation curriculum is grounded in trauma-informed care and social-emotional development principles. Every new employee completes this orientation within 7 days of hire, with 8 hours of preservice training completed before assuming responsibility for a group of children.

Module 1: Welcome and Center Overview (1 hour)

Mission, vision, and values of Benevolent House Academy. Organizational structure: governing body, director, caregivers. Tour of the facility including all classrooms, outdoor areas, emergency exits, fire extinguishers, first aid kits, and hazardous materials storage. Review of employee handbook, job description, and expectations. Introduction to Brightwheel (parent communication, attendance, daily reports). Dress code (BHA-branded shirts required during all operating hours), attendance, and professional conduct policies.

Module 2: Minimum Standards Overview (1 hour)

Introduction to Chapter 746 (Minimum Standards for Child-Care Centers). Role of Child Care Regulation (CCR) and the licensing process. Understanding what an inspection looks like and how to prepare. Child-to-caregiver ratio requirements by age group. Required postings (license, inspection report, emergency numbers, menus, activity plans). Record-keeping requirements for children and personnel files.

Module 3: Trauma-Informed Care Foundations (1.5 hours)

Understanding Adverse Childhood Experiences (ACEs) and their impact on brain development and behavior. Recognizing trauma responses in children: fight (aggression, defiance), flight (withdrawal, avoidance, running), freeze (shutting down, dissociation), and fawn (people-pleasing, hypervigilance). The difference between behavior that is willful and behavior that is a stress response. Core principles of trauma-informed care: safety, trustworthiness, choice, collaboration, and empowerment. Creating emotionally safe classroom environments. Using predictable routines and transitions to build security. Self-care for caregivers: recognizing secondary traumatic stress and compassion fatigue.

Module 4: Social-Emotional Development and Positive Guidance (1.5 hours)

Understanding social-emotional milestones by age group. Emotion coaching: helping children identify, name, and regulate their feelings. The role of co-regulation (caregiver staying calm to help a child regulate). Positive guidance techniques: encouragement, redirection, choices, natural consequences, brief separation. Relationship-based discipline: connecting before correcting. Prohibited discipline methods (detailed review with examples). Strategies for specific challenging behaviors: biting, hitting, tantrums, separation anxiety, food refusal. Building secure attachment through responsive caregiving. Documenting behavior concerns and communicating with families.

Module 5: Child Abuse and Neglect Prevention, Recognition, and Reporting (1 hour)

Texas law requirements for mandatory reporters. Definition of abuse, neglect, and exploitation under Texas Family Code Chapter 261. Factors indicating a child is at risk of abuse or neglect. Physical and behavioral warning signs indicating a child may be a victim of abuse or neglect. How to document and report suspected abuse or neglect to DFPS (1-800-252-5400 and online reporting). What happens after a report is filed. Protection from retaliation for reporting in good faith. Community organizations with training available to staff, children, and parents. Internal procedures when an allegation involves a center employee.

Module 6: Health, Safety, and Emergency Procedures (1 hour)

Daily safety check procedures (indoor and outdoor). Illness identification and exclusion criteria (Communicable Disease Chart). Injury response and incident report procedures. Medication administration procedures. Location and use of fire extinguishers and first aid equipment. Emergency preparedness plan review: fire, severe weather, lockdown, medical, and relocation to designated sites. Evacuation routes (review posted maps in each room). Administering medication in compliance with 26 TAC Section 746.3803. Preventing and responding to food allergies and allergic reactions. Building safety and hazard identification (electrical, water, vehicular, toxic materials). Handling, storing, and disposing of hazardous materials per 26 TAC Section 746.3425. SIDS prevention and safe sleep practices (infant caregivers).

Module 7: Daily Operations and Age-Specific Practices (0.5 hours)

Daily schedule review for assigned classroom. Handwashing procedures (posted at every sink). Diapering procedures (nursery and toddler staff). Feeding and mealtime procedures (including infant feeding plans). Nap/rest time procedures and supervision. Outdoor play supervision and head count procedures. Sign-in/sign-out and authorized pickup verification. Brightwheel daily reporting requirements (activities, meals, naps, incidents).

Module 8: Transportation Safety (0.5 hours)

Required for all staff who may transport children. Vehicle safety inspection procedures. Proper use of age-appropriate safety restraints. Head count procedures before departure and upon arrival. Visual vehicle check after unloading (under seats, back of vehicle). Documentation requirements. Precautions for transporting children whose chronological or developmental age is younger than nine years. Never leaving a child unattended in a vehicle. Transportation emergency procedures.

Orientation Completion

Upon completion of all modules, the employee signs an Orientation Completion Form acknowledging they have received and understand the training. The signed form is placed in the employee's personnel file. The remaining 16 hours of annual training (to total 24 hours) are completed within 90 days of hire and may include additional in-depth training on any of the

above topics, as well as child development, curriculum planning, cultural competency, and other topics aligned with minimum standards.

APPENDIX D: EQUIPMENT AND MATERIALS CHECKLIST BY ROOM

The following checklist identifies the equipment and materials provided in each classroom and the outdoor play area. Equipment is age-appropriate, in good repair, and meets applicable safety standards. Equipment is inspected regularly and replaced as needed.

Nursery (0-11 Months) - Indoor

Item	Quantity	Safety Standard
Safety-approved cribs with firm mattresses	4	CPSC compliant
Fitted crib sheets	8 (2 per crib)	
Diaper changing station with safety strap	1	Commercial grade
Infant swings	2	CPSC compliant
Bouncer/rocker seats	2	CPSC compliant
Tummy time mats/play mats	4	Non-toxic
Soft blocks, stacking rings, rattles	Assorted	No small parts
Teething toys	Assorted	BPA-free
Unbreakable wall mirrors	2	Shatterproof
Board books	15+	
Bottles/feeding supplies storage	1 unit	Labeled by child
Hands-free diaper receptacle with lid	1	Lined, covered

Classrooms 1-4 (12 Months - 4 Years) - Indoor

Item	Qty Per Room	Notes
Child-sized tables	2-3	Age-appropriate height
Child-sized chairs	10-12	Age-appropriate height
Individual cots or rest mats	10-12	Labeled by child
Cot sheets and blankets	20-24	2 sets per child, laundered weekly
Building blocks (age-appropriate size)	1 set	Duplo (young) to Lego (older)
Puzzles (age-appropriate piece count)	6-10	3-piece to 24-piece
Art supplies (crayons, markers, paint, glue, scissors)	Assorted	Non-toxic, safety scissors
Playdough/modeling clay	1 set	Non-toxic
Dramatic play items (kitchen, dolls, dress-up)	1 center	Multicultural dolls
Books (age-appropriate)	20+	Rotated regularly
Sensory table/bins	1	Sand, water, rice, etc.

Musical instruments	Assorted	Rhythm sticks, shakers, drums
Science/nature materials (magnifying glasses, plants)	1 center	Rooms 3-4
Math manipulatives (counters, patterns, shapes)	1 set	Rooms 3-4
Writing center (journals, pencils, letter cards)	1 center	Room 4
Educational tablet/computer	1	Room 4, supervised use

Classroom 5 (5-13 Years) - Indoor

Item	Quantity	Notes
Tables and chairs (school-age size)	3 tables, 10 chairs	
Homework supplies (pencils, paper, rulers, etc.)	Assorted	Restocked monthly
Age-appropriate books and magazines	30+	Variety of genres/levels
Board games and card games	10+	Rotated seasonally
Arts and crafts supplies	Assorted	
Science kits and STEM materials	3-5	Rotated
Building sets (Lego, K'Nex, etc.)	2-3 sets	
Educational tablet/computer	1-2	Supervised, educational use
Cots or rest mats (as needed)	14	Available for rest

Outdoor Play Area (All Ages, Staggered Schedule)

Item	Quantity	Notes
Age-appropriate climbing structure with slide	1	CPSC/ASTM compliant
Ride-on toys	2-4	Foot-powered
Balls (various sizes)	10+	Age-appropriate sizes
Outdoor art supplies (chalk, easel)	Assorted	Washable, non-toxic
Sports equipment (jump ropes, hula hoops, cones)	Assorted	School-age focused
Picnic tables (child and standard size)	3-4	Age-appropriate heights
Outdoor storage bin for equipment	1	Weatherproof

All outdoor equipment is installed on appropriate safety surfacing and is inspected daily before children access the outdoor area. Equipment is anchored securely and maintained in good repair. Broken or unsafe equipment is removed immediately from the play area.
